

*Creating new memories
...family friendly map*

Following on the success from our “memories matter” project we used the legacy from materials gathered heritage map from older members of the community to establish a “family friendly” map which identifies “free” supervised play opportunities around the town of Oban.

This project gave opportunities for “youth” of today to try some of the games we have gathered in our Oral History project whilst also highlight “child friendly” free outdoor space which families can visit and still enjoy in our town. By working with others we have new recordings of children play from today and created both an online and paper resource for families to use.
[PLAY MAP link](#)

The map was launched at the end of March with families enjoying an afternoon of craft and play. The map and recordings along with a list of ideas which the children have identified as things they enjoy do in the outdoors whether it is dry or raining!
This [link](#) also includes some clips from our research recordings with the local after school club and primary school

“Great resource for new families to the area”
Why is it good to play outside?
“Its fun” “it gives you energy”
quotes from recording

What were the health benefits?
Mental health/ wellbeing
Exercise – enjoying outdoors
– free outdoor activity
